- Computer Science Fundamentals, Data Structures and algorithms, Computer Networks, Relational Databases, Software Development Life Cycles, C, C++, Java, System Design

EMPLOYMENT BACKGROUND

Orderful Inc ▶

Senior Integration Engineer | 2017 - 2021

Vancouver, Canada

- As an integration Engineer my job was to develop applications in Java, deploy on AWS cloud using various AWS services such as AWS Lambda, S3, EC2, Cloudwatch, SES and API gateway in a serverless architecture.
- Worked as an onboarding architect to provide strategic directions to the customers and the leadership team to improve the implementation speed.

Doppio Group ▶

Senior Technical Consultant | 2015 - 2017

Bangalore, India

- My responsibility was to develop applications, web services, customize functionalities in Java for Infor M3 ERP.
- Lead a team to migrate data from legacy to the new ERP for a fortune 500 company. Increased the migration speed by 200% by restructuring the APIs

Nagarro Softwares ▶

Software Engineer | 2012 - 2015

Gurgaon, India

- Joined Nagarro as a Java developer and worked on various Java projects related to Banking and Credit Card domains.
- Part of the ScriptRx team to build an intuitive software for Health Care which helps to eliminate prescription pads and the handwritten prescriptions.
